Cholesterol, Vision, Lung Function, HIV & STD Testing,
Prevention and Intervention Health Information and More....**

Mission:

To improve the quality of life within our communities and enhance educational and economic opportunities for African Americans and other minorities.

Health & Wellness is a vital component of a thriving community. The 100 is concerned about the well being of the whole community and the whole person: physical, emotional/psychological and spiritual. Our initiatives are aligned with three objectives: 1. Increase public awareness regarding health issues which disproportionately impact minorities and the minority community. 2. Increase awareness and expand knowledge among all people within all the communities we serve regarding current research, therapies and practices which have demonstrated efficacy in the treatment of illnesses. 3. Help shape public policy regarding the local, state, and national health policy issues impacting low-income and minority communities. The 100 collaborates with other non-profit organizations to promote preventative health strategies, deliver screenings and provide education on prevalent diseases.
